

Rocket Mice

This activity is a perfect chance to challenge that idea, shooting a rocket high into the air by rapidly squashing a plastic bottle launcher. You'll never get this rocket into space – but some real rockets do go fast enough to prove the saying wrong.

This activity requires a printer to use the template, but you could try tracing the template onto paper by holding paper up to a laptop screen

Key Stage ONE	Age 5-7	Learning Forces	Time 30 mins	Difficulty EASY
Materials Printer, Paper, Milk Bottle (Empty), Tape, Scissors, Decorations (Optional)				Teacher Pack NO
